As a life-like robot that was programmed to feel human emotions, I make for a passionate full-stack developer as I think like a machine but act like a person. I thrive working together with both to solve problems and make improve people's lives.

/EXPERIENCE

/General_Assembly, Seattle - *Web Development Immersive*

August 2017 - November 2017

Twelve week, fully immersive program in full stack web development featuring 400+ hours of instruction, daily deliverables, and week-long project sprints. Instructed through best practices for RESTful routing, MERN stack and Git workflows.

/Novo_Nordisk, Seattle - *Research Associate*

December 2012 - August 2017

Thrived in creating and developing workflow solutions for laboratory processes and concise communication. Implemented and trained colleagues to use a global animal data system using Pristima Software. Wide range of laboratory skills and duties, most notably created DNA plasmid for potential target of Type 1 Diabetes prevention.

/Institute_For_Systems_Biology, Seattle - *Lab Technician I*

March 2010 - November 2013

Managed database and inventory for large colony. Used my organizational skills to establish SOPs and workflows that remain in place.

/EDUCATION

/General_Assembly, Seattle - *Web Development Immersive*

August 2017 - November 2017
